PROFESSIONAL SUMMARY

Results-oriented Cloud Engineer with 1.5+ year of hands-on experience in infrastructure monitoring, application deployment, and server management. Proficient in Zabbix-based monitoring and TS Plus remote desktop administration. Proven ability to ensure system reliability, streamline service operations, and maintain high-availability environments. Passionate about applying cloud and DevOps practices to drive operational efficiency and scalability.

TECHNICAL SKILLS

- **AWS:** EC2, S3, IAM, VPC, RDS, EKS.
- **Terraform:** Infrastructure as Code, modules, state management, and AWS provisioning.
- **Git:** Version control, Branching strategies, and Collaborative workflows.
- **Jenkins:** CI/CD pipeline, job configuration, and plugin management.
- **Linux:** File system, User management, and Process control.
- **Ansible:** Agentless configuration management, playbooks, and role-based automation.
- **Docker:** Containerization, Dockerfiles, Images, and Container orchestration basics.
- **Kubernetes:** Pod management, deployments, services, and cluster operations.
- **Zabbix:** Monitoring, Alerting, Dashboards, Triggers, Agents.
- **TS Plus:** Session Management, Application Publishing, Multi-User sessions, User profile management.
- **Web Dev:** HTML, CSS and JavaScript.

WORK EXPERIENCE

Cloud Engineer — Mieux Technologies Pvt. Ltd., Delhi

March 2025 – Present

TS Plus & Remote Desktop Administration

- Published and maintained applications via TS Plus, enabling seamless remote software delivery to end users.
- Maintained and customized the TS Plus Web Access portal to improve user-friendly accessibility.
- Managed multi-user login sessions and handled user profile configurations for remote workers.
- Troubleshot connectivity issues for remote users, diagnosing session failures and restoring access with minimal downtime.
- Resolved printer mapping failures for users accessing sessions through TS Plus.
- Reassigned and republished application icons following server migrations and configuration changes.

Infrastructure Monitoring – Zabbix

- Monitored server and service health using Zabbix, ensuring rapid identification and resolution of infrastructure issues to minimize downtime.
- Created and configured custom triggers to proactively detect anomalies and alert teams before issues escalated.
- Onboarded new hosts and devices into Zabbix, expanding infrastructure visibility across the environment.
- Contributed to server-side reporting, performance reviews, and compliance monitoring to maintain data integrity.

Cloud L1 Support & Ticketing

- Provided Cloud Level 1 (L1) support, handling incident tickets and troubleshooting user-reported issues with SLA adherence.
- Generated ticket reports to track recurring issues and continuously improve support efficiency.
- Triaged and assigned tickets to appropriate team members based on issue type and team workload.
